

Lower Energy Bills 15% with our Elastomeric Roof Coatings!

Source: energy.gov

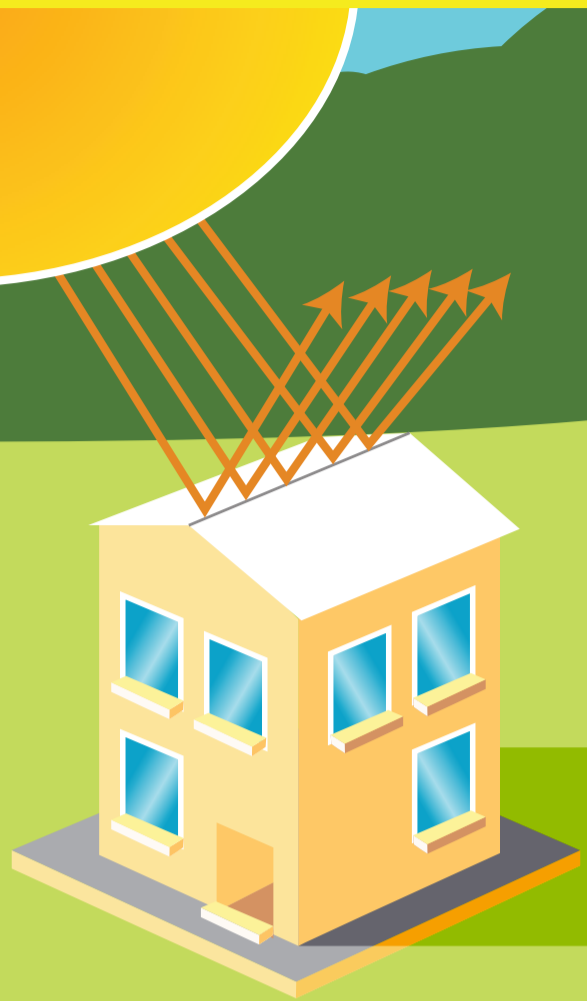

Dark Roofs absorb and hold in radiation from the sun

Dark Roofs release absorbed heat into the home, raising a home's base temperature

Higher internal temperatures result in higher utility bills

Light Roofs reflect solar energy, Re-emitting up to 90% of solar Radiation

Light Roofs reflection of sun's rays can contribute an additional 20-25 Degree indoor temp decreasing the home's cooling costs

Having a light roof can save a homeowner up to 15% in energy costs.
